Sonal Sherkar, MSc

Business Intelligence Analyst | Data Analyst

United Kingdom | sonalshivajisherkar28@gmail.com | +447393064031 | LinkedIn

Personal Statement

Data Analyst with an MSc in Data Science and practical experience in business intelligence, data analysis, dashboard development, and reporting. Skilled in Power BI, SQL, Tableau, Python, and Advanced Excel, with knowledge of data extraction, transformation, data modelling, DAX, Power Query, KPI reporting, and data validation. Experienced in developing interactive dashboards, analysing business performance, reconciling reports, and translating business requirements into actionable insights.

Technical Skills

Business Intelligence and Visualisation: Power BI, Tableau, interactive dashboards, KPI reporting, data visualisation, business performance analysis

SQL and Databases: SQL, MySQL, SQLite, SELECT statements, JOINs, filtering, aggregate functions, GROUP BY, subqueries, data extraction

Data Transformation and Modelling: Power Query, data cleaning, data transformation, data modelling, table relationships, DAX, calculated measures, data integration

Excel and Reporting: Excel, PivotTables, Pivot Charts, VLOOKUP, XLOOKUP, IF, SUMIFS, COUNTIFS, Power Pivot

Programming and Analytics: Python, Pandas, exploratory data analysis (EDA), statistical analysis, trend analysis

Data Quality and Documentation: Data validation, missing value and duplicate checks, report reconciliation, dashboard testing, KPI definitions, reporting logic documentation

Professional Experience

Intern - Junior Data Analyst (Hybrid) | Fortray Global Services Ltd., London, UK | January 2025 – Present

- Built 5 interactive dashboards to monitor KPIs, visualise business performance, and support data-driven decision-making.
- Analysed business data to identify trends, investigate performance differences, and support operational and reporting requirements.
- Used SQL queries, including JOINs, filters, and aggregate functions, to extract, combine, and analyse data from multiple sources.
- Applied Power Query, DAX measures, and data modelling techniques to transform datasets, establish table relationships, and maintain consistent KPI calculations.
- Automated and streamlined reporting processes, reducing reporting time by 40% through improved data preparation and reporting workflows.
- Contributed to process improvements that increased operational efficiency by 20% through dashboard development, reporting improvements, and data-driven insights.
- Performed data validation, report reconciliation, and dashboard testing to identify discrepancies and improve reporting reliability.
- Collaborated with stakeholders to understand reporting requirements, clarify KPI definitions, and translate business questions into useful analytical outputs.
- Documented data sources, calculations, and reporting logic to support consistent reporting and communicate findings clearly.

Intern - Data Analyst | Source Code Technology Private Ltd., India | November 2022 – April 2023

- Assisted with collecting, cleaning, formatting, and preparing datasets using SQL, Python, and Microsoft Excel.
- Wrote SQL queries to retrieve, filter, and organise data for analysis and reporting.
- Conducted exploratory data analysis to identify patterns, trends, and potential data inconsistencies.
- Created Power BI dashboards using charts, tables, and KPI visuals to present analytical findings.
- Performed data quality checks to identify missing values, duplicate records, and inconsistencies.
- Supported analytical reporting and presentations by organising data and summarising findings.

Key Projects

Insurance Agent Performance & Segmentation Dashboard | Power BI, DAX, Power Query, Data Modelling

- Developed an interactive Power BI dashboard to analyse insurance agency performance and monitor policies in force, quotes, retention ratios, hit ratios, loss ratios, and growth trends.
- Combined multiple datasets and established table relationships to support analysis across agencies, states, age groups, and insurance lines.
- Created DAX measures and KPI visuals to monitor performance and compare key insurance metrics.
- Designed interactive filters, KPI cards, charts, tables, and Top-N analysis to explore performance across business segments.
- Used Power Query to clean, transform, and prepare datasets for consistent reporting.

COVID-19 in India Dashboard | Tableau • Data Analysis | Tableau Public: [View Dashboard]

- Developed an interactive Tableau dashboard to analyse COVID-19 data across Indian states.
- Created geographic maps to compare reported deaths and identify regional differences.
- Designed visualizations to explore age-group and gender distributions, vaccination data, and testing-laboratory availability.
- Combined multiple worksheets into a dashboard to present public-health metrics and regional comparisons.

Education

MSc Data Science
University of Hertfordshire, UK | 2023 – 2024
B.E. Computer Engineering
Savitribai Phule Pune University, India | 2019 – 2022

Certifications

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) — June 2026
- Data Analytics with Python & SQL Certification — Simplilearn
- Business Analytics with Excel — Simplilearn

Other Experience

Supermarket Assistant | Waitrose, London, UK | March 2024 – December 2025

- Maintained accurate inventory and stock records to support daily store operations.
- Reviewed stock information and communicated operational updates to colleagues and management.
- Worked collaboratively in a fast-paced environment, demonstrating attention to detail, reliability, teamwork, and effective communication.
